

Is the ocean Safe!?

Swimming is good swimming is life because you get stronger every time.

You need goggles, swimming hats and a swimming costume to wear.

I really love swimming but definitely not in the ocean. Water is life. Water is life.

Why is the ocean not safe? Why?

These species can harm you within the ocean: Sharks, Jelly Fish, Sea Birds and Piranha Fish.

They will gobble you up like a bit of meat to feast on.

In front of me was a big bright blue swimming pool which is much safer than the ocean.

Down below this ocean looked like an empty mysterious town. It was Blue, Grey, Green and with beautiful colours. Something is shining heavily above the sky – I wonder what it could be?
